Summary

Computer Science and Cyber Security undergraduate specializing in applied machine learning, backend engineering, and application security. Developer of predictive models achieving a 0.82 F1-score and scalable RESTful backend services.

Education

Indian Institute of Information Technology, Una

B.Tech – Computer Science and Engineering (Cyber Security)

CBSE Board (Class XII: 86.4% | Class X: 92.4%)

Aug 2024 – Present

CGPA: 8.25 / 10.0

Apr 2022 – May 2024

Projects

GitHub PR Intelligence System

Jul 2026 – Aug 2026

Python, Pandas, NumPy, Scikit-learn, XGBoost, SQLite, GitHub API

GitHub

- Architected a predictive analytics engine supporting 3 developer workflows in 10 repositories to optimize code review allocation for 100+ contributors.
- Automated data extraction from 10 open-source repositories by constructing an ETL pipeline processing 5,000+ commits and review events.
- Executed feature engineering and hyperparameter tuning for classification and regression pipelines, boosting classification F1-score by 14% over baseline models.
- Evaluated model performance using 8 quantitative metrics, achieving a 0.82 F1-score and 0.88 ROC-AUC on PR classification tasks.
- Trained XGBoost, Random Forest, Logistic Regression, and Ridge Regression models on 5,000+ data points to minimize false-positive bottleneck flags on review workflows.
- Structured pipeline source code into 3 modular stages with complete documentation coverage to ensure end-to-end reproducibility.

AI Interview Prep & Analysis Platform

May 2026 – Jun 2026

React.js, Node.js, Express.js, MongoDB, Google Gemini API

GitHub

- Built an interview preparation platform covering automated evaluation, answer scoring, and feedback generation for 50+ technical subjects.
- Integrated Google Gemini API to evaluate candidate text responses in under 2 seconds, achieving high agreement with predefined evaluation criteria across 100+ test cases.
- Implemented OWASP security controls including JWT tokens, bcrypt password hashing, and API rate limiting set to 100 requests per IP per hour.
- Constructed RESTful backend services using Node.js and Express.js, optimizing database query performance via MongoDB indexing.
- Designed a responsive dark/light user interface with 15+ reusable React components, ensuring responsive UI consistency across desktop and mobile devices.
- Engineered 30+ unit and integration tests for authentication workflows and API routes, catching regression issues before deployment.

Technical Skills

- Programming Languages:** C, C++, Python, JavaScript, SQL
- Machine Learning & AI:** Scikit-learn, XGBoost, Random Forest, Logistic Regression, Linear/Ridge Regression, Feature Engineering, NumPy, Pandas, Matplotlib, Seaborn
- Web Development:** React.js, Node.js, Express.js, REST APIs, MERN Stack, HTML, CSS
- Databases:** MySQL, MongoDB, SQLite
- Cybersecurity:** Cryptography, Mobile Forensics, Network Security, JWT
- Tools & Platforms:** Git, GitHub, VS Code, Linux, Postman

Certifications

Intermediate-level Projects using C++ – CodeChef

Jun 2025

Web Development using JavaScript – CodeChef

Jul 2025

Leadership Experience

Secretary, Astral Club, IIIT Una

Apr 2025 – Apr 2026

- Led a team of 12 student organizers to execute 5 technical workshops, boosting campus event attendance by 30%.
- Managed event allocation and scheduling for 5 campus initiatives, ensuring on-time delivery within allotted budget constraints.

Achievements

- Competitive Programming:** Solved 500+ algorithmic problems across LeetCode and CodeChef, competing regularly in rated programming contests.
